

# PACIFIC TECH & ENGINEERING LTD.

UNIVERSAL SAFETY SOLUTION

Authorized Distributor :  **NAFFCO**  
PASSION TO PROTECT

## ABOUT US

**Pacific Tech and Engineering Limited** is an advancing company specialized in Fire Safety, Security and Engineering Solutions. The organization is dedicated in Fire Detection, Fire Protection, Fire Rated Door and furthermore initiated steps to expand its operations across the field of Public Address System, CCTV, Access Control, Time Attendance, Substation, Transformers, HT Switchgear, LT Switchgear, PFI Plant, LPS, Lift, Generator & Solar systems.

**PTEL** offers a broad range of Safety, Security and risk assessment and mitigation services to protect people, property and the environment. It is steadfast to helping its clients evaluate, address and alleviate risks and offer service in Design, Installation, Testing & Commissioning and Maintenance of their installations. **PTEL** preserves in its pool teams of professional staff trained in facilities at home and abroad.

Our professional individuals are equipped with capability and knowledge to support requirements within Fire Safety, Security and Electrical Engineering Business. **PTEL** is constantly improving quality and reliability of services.

Throughout design phases, **PTEL** integrates the necessary compliant and state-of-the-art Security & Fire System codes to meet Protection Benchmarks, Including Environmental, Healthcare, Industrial, Manufacturing, Power and data centers and so forth.

**PTEL** takes pride in its stability, Technical Expertise and Business Excellence. The company is pleased to be allied with leading companies in the industrial regions of Bangladesh and is providing fully unified Fire Safety, Security and Electrical Engineering Solutions to Prominent RMG, Chemical & Pharmaceutical Industries, Hospitals, Hotel, High-Rise Buildings as well.

The company is shaped combining the services of professionally skilled Engineers, Technologists and Technicians in the fields stated above. **PTEL** wishes to advance business partnership with clients looking for solutions in Fire linked hazardous problems and in other engineering services.

**PTEL** is passionate in advancing the application of science of safety and is capable to induct consultancy services of International Fire Safety giants in case capacity of a project demands teamwork. The company is conversant with implementing follow-up inspection approvals with regard to proper implementation of upgrades and correcting life Safety Deficiencies and Fire Safety Hazards Pointed out by RSC, ELEVATE & FSCD.

Mission: Steadily growing through involvement in Fire Detection and Fire Protection solutions by products and services of international standards maintaining high level customer satisfaction.

Vision: Driven by the spirit of accomplishments, **PTEL** aims at growing into a national entity scoring objectives in the area of safety solutions.

## AUTHORIZED DISTRIBUTOR CERTIFICATE

REFERENCE: NF/SB/PC/03/022  
Date: 29 Mar 2022

### NAFFCO FZCO

CONFIRMS THAT  
**M/S. PACIFIC TECH & ENGINEERING LTD**  
AUTHORIZED DISTRIBUTOR IN THE TERRITORY OF  
**BANGLADESH**

This certification is confined to the purposes mentioned above and shall not be construed as to give the distributor any authority or power to act on behalf of NAFFCO FZCO, or to enter into any contracts or to receive and remit money, or to take decisions, and to give any promises, representation, warranties/guarantees on behalf of NAFFCO FZCO, unless otherwise authorized in writing.

This certificate is valid up to 28 Feb 2024.

**ALI KHAND AL KHATIB**  
Managing Director

## Certificate of Authorization

REFERENCE: SD/SB/BD/PTEL/22322

Shield Fire, Safety & Security Ltd Confirms that  
**M/s. Pacific Tech & Engineering Ltd.**  
AUTHORIZED DISTRIBUTOR IN THE TERRITORY OF  
**Bangladesh**

This authorized Distributorship that underlies this appointment and this certificate, are not transferable and will continue in effect until Feb 28, 2024 unless terminated, Suspended or Revoked.

**Sam Jaber**  
(Sales & Marketing Manager)

## SYSTEM & SOLUTION:

- »» Consultancy, Products Supply & Installation with after Sales Services:

## FIRE, SAFETY & SECURITY SYSTEM

- »» Fire Pump Set (Type: Split-Case, End-Suction & Vertical Turbine).
- »» Fire Standpipe & Hydrant System.
- »» Fire Sprinkler System.
- »» Fire Gas Suppression System. (CO2, FM200, Novec-1230, Inert Gas)
- »» Foam Suppression System.
- »» Fire Rated Door & Accessories.
- »» Fire Detection & Alarm System.
- »» Fire Aspiration System.
- »» Automatic Smoke & Fire Curtains.
- »» Fire Rated Damper & Louvers System.
- »» PAVA System.
- »» CCTV & Remote Surveillance System.

## ELECTRICAL & OTHERS SYSTEM

### SUBSTATION SOLUTIONS:

- »» Sub-Station Full Package
- »» Distribution Transformer
- »» High Tension (HT) Switchgear
- »» Low Tension (LT) Switchgear
- »» Power Factor Improvement (PFI) Plant
- »» Main Distribution Board (MDB)
- »» Sub Distribution Board (SDB)
- »» Industrial Voltage Stabilizer (IVS)

### OTHERS:

- »» LPS System
- »» Solar System
- »» HVAC System
- »» Lift & Generator
- »» MEP Consultancy
- »» System Drawing & Design
- »» Civil Consultancy & Construction

## OUR GLOBAL PARTNERS

# FIRE ADDRESSABLE DETECTION & ALARM SYSTEM

## Intergrated Fire and Voice Control Panel

- UL 864 10<sup>th</sup> Edition & FM Approved.
- Point Flexibility of 2100 Points.
- Supports 2000W per system.
- Upto 64,000 Watts of power across the network.
- Amplifiers supporting 520Hz Low frequency.
- Distributed SLC Expander & Amplifiers throughout the field.
- Choice to configure 15 recordable one minute messages.
- Available in Red or Black cabinet.
- Enhanced Intelligent network monitoring over Graphics.
- Secured communication over Wired/Wireless multifunctional devices.
- Seamless Integration with BMS.

## Addressable Fire Alarm Control Panels

- UL 864 10<sup>th</sup> Edition & FM Approved.
- Point Flexibility of 2100 Points.
- Distributed SLC Expander throughout the field.
- 318 Addressable devices per loop.
- Flexible addition of SLC loop expanders Via SBUS.
- User Friendly LCD display.
- Expandable to 32 node in network.
- Supporting over 67,200 points on a single peer to peer network.
- Choice of Copper, Fiber Connection in single network.
- Available in Red or Black cabinet.
- Enhanced Intelligent network monitoring over Graphics.
- Secured communication over Wired/Wireless multifunctional devices.
- Seamless Integration with BMS.

The Industrial VESDA VLI by Xtrails is the first very early warning aspirating smoke detector purpose-built for the protection of industrial applications of up to 2,000 square meters (20,000 sq.t.) Housed in a ruggedized industrial enclosure and incorporating patented long-life, fail-safe filter technology features along with other best-safe in class VESDA features, the VLI sets a new benchmark for the protection of industrial applications. The detector showcases a hat of specifically designed to address the common challenges of industrial applications such as high background levels of air bone particles, detector longevity and deterministic maintenance.

# UL LISTED FIRE RATED DOOR & ACCESSORIES

## FIRE RATED DOORS:

NAFFCO has a dedicated state-of-the-art manufacturing facility for Fire Rated Doors. With one of the highest production capacities in the industry, NAFFCO is positioned as a leader in the door and hardware market.

NAFFCO's strength is in the reliability it can offer. With one of the highest numbers of sophisticated machinery and expert professionals, NAFFCO ensures compliance to its commitments and client requirements.

Our strict zero tolerance quality program guarantees client satisfaction in each and every delivered unit, making the NAFFCO brand synonymous with quality.

## FIRE RATED STEEL DOORS:

NAFFCO Steel Doors combine Fire Resistance with Door Functionality without compromising any aspect of both the requirements. These types of Doors reduce the Spread of Fire and enable Safe Egress, in-addition to offering highest degree of Compartmentalization. These types of Doors are highly preferred in all types of Buildings, nowadays, to offer Safe and Secure living and Egress. Our Technical Team is always available to offer advice and planning.

### SIZES

Custom Sizes available (Contact our Technical Team to know more about max. available Sizes for Fire Rated Doorsets)

### FIRE RATING

Up to 120 Minutes

NAFFCO Fire Rated Doors are designed and manufactured in accordance with internationally recognized standards such as:

- NFPA 80 • SDI
- ANSI/UL 10B
- ANSI/UL 10C
- BS 476 Part 22
- CAN/ULC-S104
- NAIMM HMMA
- AHJ
- NFPA 252

## FIRE RATED GLAZED DOORS

Glazed Doors are suitable for any application where Aesthetical and Well Lit environment are required in addition to an environment where Vision of sight is demanded to the other side of a Room.

### SIZES

Custom Sizes available (Contact our Technical Team to know more about max. available Sizes for Fire Rated Doorsets)

### FIRE RATING

Up to 120 Minutes.

### APPLICATIONS

- Malls • Libraries • Schools • Government Buildings • Hospitals
- Corporate Locations

Trim Lock

Magnetic Door Holder

Panic Bar

Door closer

Hings

Door Coordinator

**fireframes**  
DESIGNER SERIES

## GLAZED DOOR

The NAFFCO Designer Series doors and frames incorporate precise European engineering to provide a sleek, modern alternative to traditional steel hollow metal frames. The Designer Series system possesses narrow / wide stile or hollow metal wide stile steel profiles, thereby exceeding traditional fire-rated frame systems in aesthetics and performance. Available, with fire ratings from 20 to 240 minutes, this system can incorporate a wide range of fire-rated glazing materials with glass sizes that surpass traditional systems.

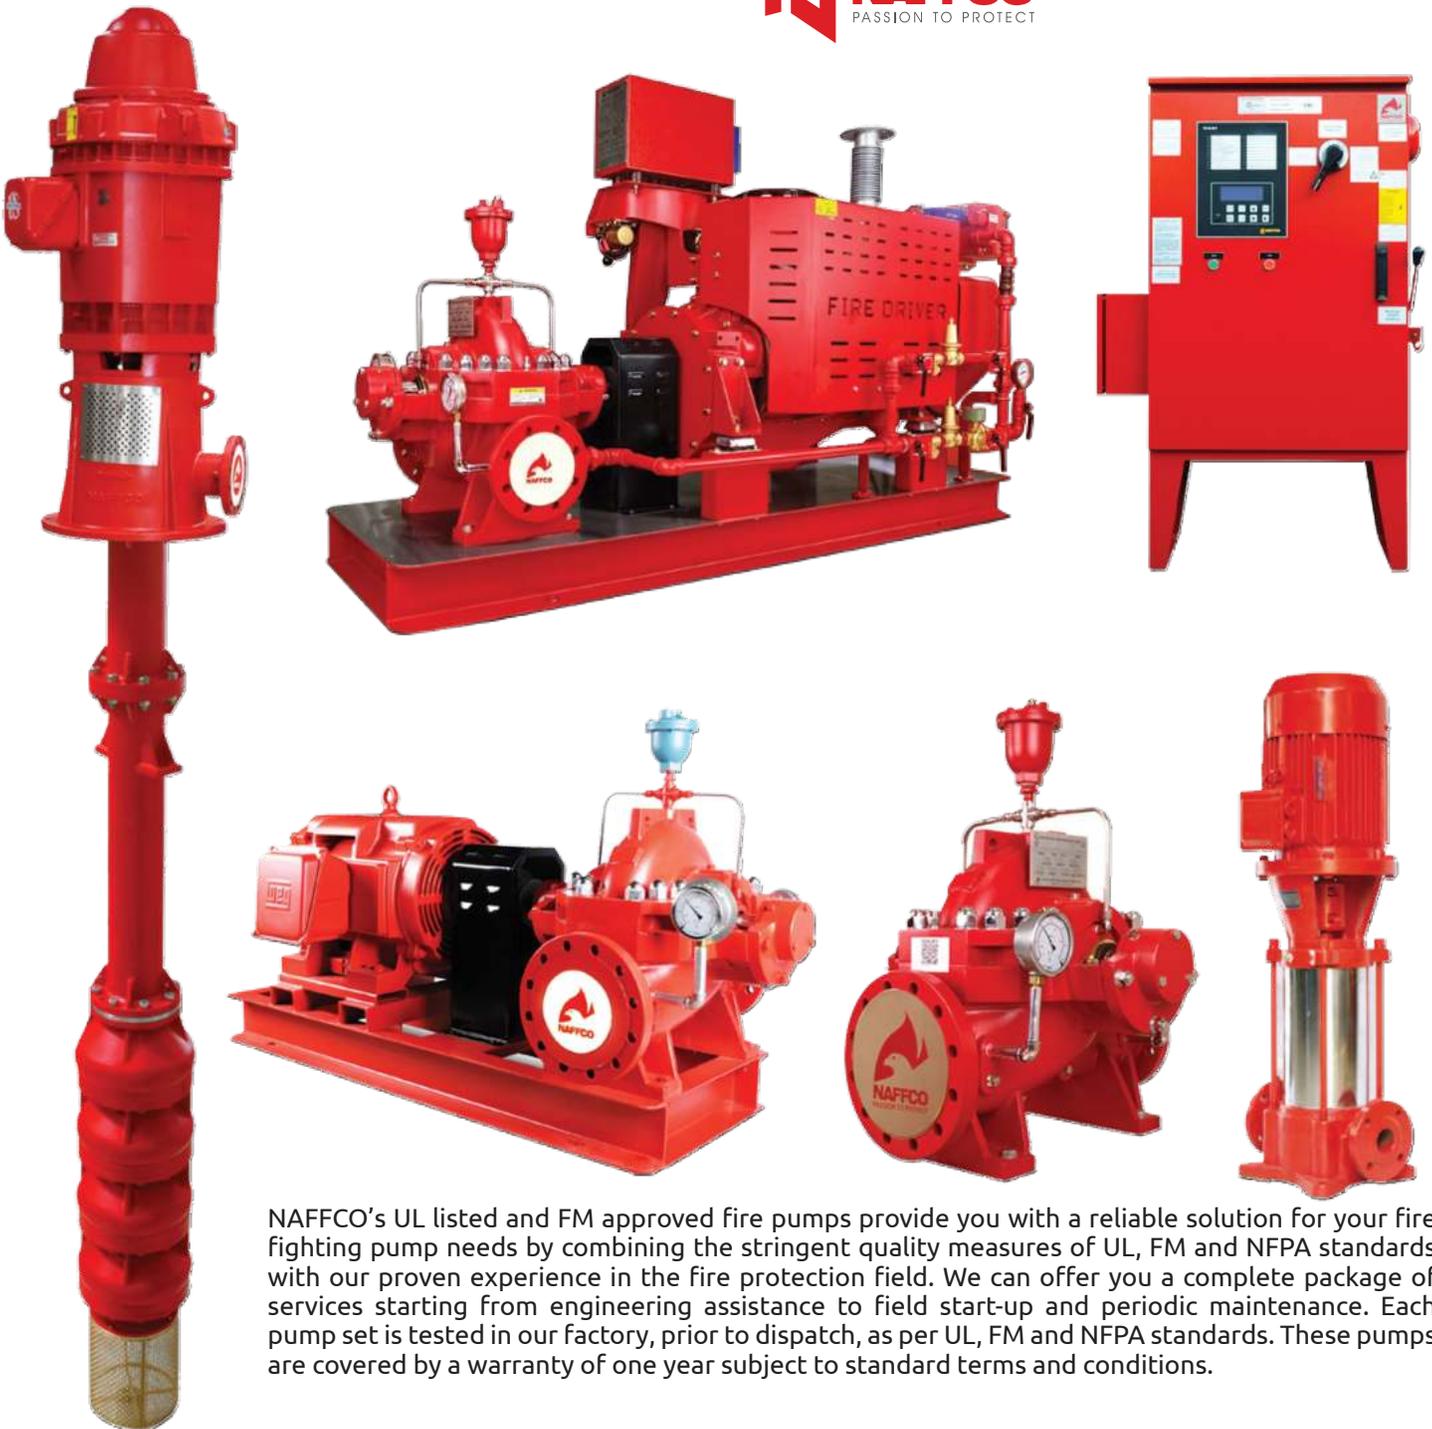

### AREAS OF APPLICATION

- Schools and Libraries
- Hospitals
- Shopping Malls
- Government Buildings
- Office Entrances and Corporate Locations
- Airports
- Metros and Rail Terminals

### KEY FEATURES

- Fabricated and Assembled in UAE
- Full Vision Fire Doors
- Available in Narrow / Wide Steel Profiles and Hollow Metal Wide Stile Construction
- Modular system that can incorporate up to 240\* Minutes Fire Integrity
- Powder Coated at factory to match desired color scheme
- Optionally, Brushed Stainless Steel finish available
- Tested to UBC 7-2, UBC 7-4, ANSI/UL 9, 10B, 10C [Positive Pressure Test Standard] (or) BS 476 Part 22 Standard
- Oversize options available
- Multiple Glazing Options [Firelite, Firelite NT, Firelite Plus and Pyrostop], Contraflam
- Easy Installation similar to typical storefront systems
- Frames supplied Welded or Knock-Down, ready for Installation
- Hardware available to fit functional requirements (Please check with NAFFCO for compatibility)

# UL LISTED FIRE PUMP (VERTICAL & SPLIT CASE)

NAFFCO's UL listed and FM approved fire pumps provide you with a reliable solution for your fire fighting pump needs by combining the stringent quality measures of UL, FM and NFPA standards with our proven experience in the fire protection field. We can offer you a complete package of services starting from engineering assistance to field start-up and periodic maintenance. Each pump set is tested in our factory, prior to dispatch, as per UL, FM and NFPA standards. These pumps are covered by a warranty of one year subject to standard terms and conditions.

## HORIZONTAL SPLIT CASE PUMPS:

### FEATURES

- Performance characteristics as per NFPA 20
- Complete unit responsibility.
- Complete in-house fabrication capabilities.
- Hydrostatic testing facilities.
- Operation run test as per NFPA 20, UL 448 and FM 1311 requirements.
- Horizontal Split case pumps for capacities from 750 to 1500 US GPM.
- Drivers: Electric motor drive or diesel engine drive.
- Electrical testing capabilities for motors and controllers as per NFPA standards.
- Capable of supplying additional accessories wherever required.

## FIRE FIGHTING PUMPS:

### FEATURES

- Performance characteristics as per NFPA 20
- Complete unit responsibility.
- Complete in-house fabrication capabilities.
- Hydrostatic strength testing facilities.
- Operation run test as per NFPA 20, UL 448 and FM 1319 requirements.
- End suction models for capacities from 50 to 500 US GPM.
- Drivers: Electric motor drive or diesel engine drive.
- Electrical testing capabilities for motors and controllers as per NFPA standards.
- Capable to supply additional accessories wherever required.
- Capable of supplying single skid mounted fire pump set.

# THREADED & GROOVED FITTINGS

## SHIELD

UL Listed & FM Approved threaded fittings for fire-fighting and chilled water applications.

Available in Malleable/Ductile Iron with Black or Galvanized finish.

Ductile Iron Grooved fittings recommended for fire-fighting/HVAC/Water applications.

Available in Red/Galvanized finish.

## MS 40-SCH PIPING SYSTEM

### Seamless & ERW Steel Pipes

- Manufactured in accordance with API/ASTM, BS, UL and FM approvals.
- Available in Hot Dipped Galvanized, Black and Powder coating finish.
- Copper/Nickel/Alloy/Stainless Pipes available for order also.

# FIRE SUPPRESSION SYSTEM

- A fully-integrated state-of-the art detection System
- Proven fire suppression technology for CO<sub>2</sub>, HFC227ea system, NAFFCO Inert Gas system & NOVEC system
- Design, manufacture, installation, maintenance and service all from one company – NAFFCO

**NOVEC SYSTEM 3M** [www.ptel.com.bd](http://www.ptel.com.bd) | 13

## CEMENTITIOUS PAINT

NAFFCO's UL approved Cementitious fire protection coating is applied through a spray using special equipment to protect structural steel or concrete from the effects of fire for a nominal fire resistance period.

The cement based fireproof coating has excellent physical properties for interior/architectural uses and it can give up to hours of fire protection.

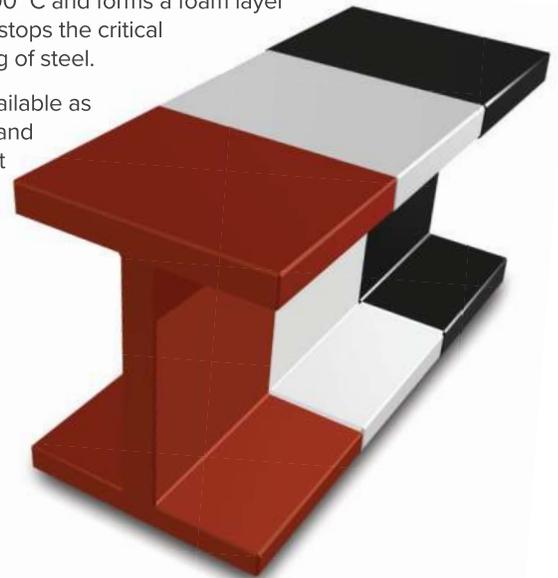

## INTUMESCENT PAINT

Load-bearing capacity of steel decreases above 550°C. Beams lose their strength to the extent that the structure can suffer damage and if the worst happens, the structure could collapse.

NAFFCO's Intumescent paint coating starts to swell at about 180-200 °C and forms a foam layer which stops the critical heating of steel.

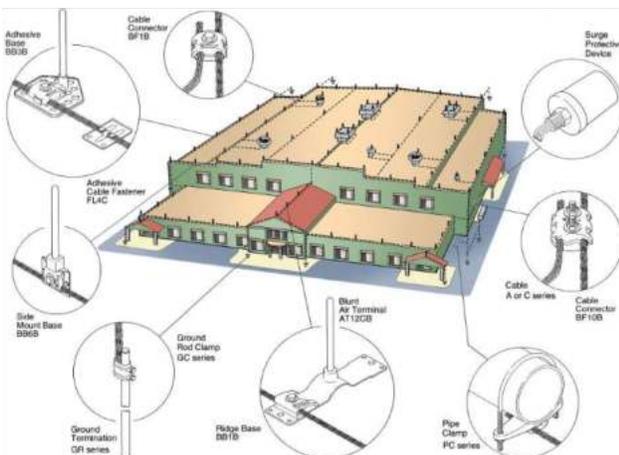

It is available as water and solvent based paints.

## LIGHTNING PROTECTION SYSTEM

A lightning protection system includes a network of air terminals, bonding conductors, and ground electrodes designed to provide a low impedance path to ground for potential strikes. Lightning protection systems are used to prevent lightning strike damage to structures.

# SMOKE & FIRE CURTAIN

## EGRESS FIRE CURTAIN

Fire containment systems prevent the spreading of smoke from one zone to another. NAFFCO curtain comprises of flexible heat resistant fabric with fire integrity up to 120mins.\*. The tube contains a DC electric motor which holds the curtain retracted at ceiling level at all times and deploys upon the receipt of fire alarm signal. The bottom bar ensures safe and controlled descent of the curtain with gravity fail safe.

By utilizing an egress door that allows individuals to pass without retracting the curtain. NAFFCO automatic egress fire curtains provide fire separation without impeding the transit of occupants exiting the area.

Egress curtain can be used in elevator lobbies, cross corridors and various passage ways and escape routes.

### Fire Integrity

- Up to 180 min.

## ELEVATOR AND ELEVATOR LOBBIES

Elevator shafts are the common conduits for the spread of fire and smoke which can enshroud the entire building in a short period. Even though elevator doors are fire rated, they do not provide a smoke seal. Fire curtains with smoke seals can be used in this scenario to contain the smoke from spreading into the lobby.

## ESCALATORS AND STAIRCASES

Both escalators and staircases are breaches between floors and can be an easy means for the spread of fire and smoke throughout the building. Using NAFFCO's fire and smoke curtain, the spread can be controlled and directed to provide easy escape for the occupants.

## CORRIDORS AND ESCAPE ROUTES

Fire curtains and smoke curtains are easily retractable which allows for quick and effective evacuation during emergency situations. Our curtains come with various means of egress\* that allow for safe evacuation once deployed in the fire scenario.

## COMPARTMENTATION

Preventing the spread of fire and smoke from one zone to another is a crucial element of fire compartmentation strategy. NAFFCO's fire and smoke curtains respectively work as a physical barrier and help contain the spread of the fire and smoke throughout the building.

## ROLLING SHUTTER

Fire Rated / Non-Fire Rated

Fire shutters are used to provide compartmentalization for wide/big openings within a building and as such, help prevent a fire from rapidly spreading to other parts of the building. In-addition to it, these shutters offer the required security and accessibility. This way, fire shutters allow people to evacuate safely and helps to make the work of the emergency services easier. Whilst conventional static barriers are permanently fixed in one place and are non-operational (e.g. fire-walls, glass partitions, etc.), a fire shutter can actually be operated (whenever required) and will close automatically in the event of a fire.

### AREAS OF APPLICATIONS

- Warehouse
- Industrial Facilities
- Garages
- Shopping Malls
- Airports
- Metros and Rail Terminals

### KEY FEATURES

- Fabricated and Assembled in UAE
- Up to 240\* Minutes Fire Integrity
- Tested to ANSI/UL 10B (or) BS 476 Part 22 Standard
- Sizes\* upto 12 m (w) x 6.5 m (h) for 2 hours and 12 m (w) x 4.6 m (h) for 4 hours under specific standard.
- Electrically Operated with Emergency Manual Override Chain
- Optional Wind Lock Feature
- Superior Galvanized Steel Slats
- Option of Single / Double Skin
- Incorporates Heavy Duty Guide Channels
- Fusible Link / Fire Alarm Signal / Heat (or) Smoke Detector Activation / Delay Timer
- Fire alarm signal conversion panel with battery back up
- 3-way Push Button Control
- Finished Factory Applied Powder Coating at factory to match desired RAL color scheme
- Option of larger sizes with special assessment
